

VENDOR HANDOVER DRAFT V1

Red Themed Wedding Ground Layout

A planned exhibition-style flow for 550 guests, using a central raised mandap, clear circulation lanes, defined bride-groom seating, appetizer promenade, compact music setup, and batch-wise dining.

Venue shape	Rectangular open ground
Guest count	550 guests
Dining	Rotating batches
Scale assumption	330 ft x 210 ft

PLANNING PRINCIPLE

Use a single central axis for drama, then keep guest movement on the sides. The mandap remains the visual anchor, while food, lounge, gifts, and music each get a defined place.

GUEST FLOW

- 1 Guests enter through one red gate and land in a welcome/photo plaza.
- 2 The main aisle stays clear for bride, groom, family, photography, and ritual movement.
- 3 Guests take left/right circulation lanes to reach seating, lounge, appetizers, or dining.
- 4 After ceremony, side lanes naturally pull guests to appetizers, then dining batches.

NO-BLOCK RULES

- A Keep the 12-14 ft red aisle free of chairs, counters, camera tripods, and decor props.
- B Keep a 14 ft clear halo around the mandap for priests, family, photographers, and emergency movement.
- C Do not place tall decor between mandap and guest seating. Tall items stay on aisle sides or perimeter.
- D Food counters should face inward inside their zones, so queues do not spill into ceremony sightlines.

Key vendor instruction

This should feel like a curated exhibition: one main path, clear side loops, each activity visible, no random island counters, no decor blocking the mandap, and

Food and lounge zones

Clear circulation lanes

no guest queue crossing the central aisle.

ZONE SPECS FOR VENDOR

Raised Mandap

32 ft x 32 ft platform, 2-3 ft height, centered in ceremony field with 14 ft clear walking halo.

Ceremony Seating

300-350 seats visible at once, split into left, right, rear, and VIP family blocks. Keep rows broken by aisles.

Bride-Groom Lounge

42 ft x 15 ft defined lounge zone beside mandap, with sofa, low stage, backdrop, and controlled photo queue.

Music Setup

Small 35 ft x 15 ft side setup. Low riser, speakers angled inward, no tall LED wall facing mandap.

Appetizers

Four main counters shown; can expand to 6-8 by extending along left/right edge. Keep center as standing lounge.

Dining

Batch-wise dining for 180-220 guests per round. Buffet at far end to avoid food crowd near ceremony.

Perimeter Loop

Minimum 10-12 ft open lane around the layout for guest overflow, service, elders, and emergency movement.

Entry Plaza

Welcome desk and photo wall stay at sides. The center remains open so guests do not pile up at the gate.

CAPACITY LOGIC

AREA	TARGET CAPACITY	WHY
Ceremony chairs	300-350	Enough for active viewing while 550 guests rotate through lounge, appetizers, and standing areas.
VIP seating	40-60	Close family gets defined priority without blocking the aisle or mandap.
Dining batch	180-220	Three dining batches cover 550 guests with less crowding and better service quality.
Appetizer zone	120-160 at a time	Promenade format keeps people moving and makes the area feel enjoyable.

DECORATOR NOTES

- 1 Red drapes should be strongest on the entry aisle and mandap. Balance with ivory chairs, gold light, and warm white chandeliers.
- 2 Use floral borders to define zones instead of solid barriers. Guests should see the next experience from where they stand.
- 3 Keep bride-groom seating visually special with a backdrop, rug, and side floral frame, but avoid building it as a second competing stage.
- 4 Appetizer counters should be repeated in one visual language, like exhibition booths, not scattered independent stalls.
